S 08

BASS REFLEX SUBWOOFER

Description

S 08 is a high-power, compact subwoofer system ideal for those installations where the physically small size and impact of an 8'' driver are desired. The extended frequency response reaches below 40 Hz, while the efficient design enables output levels far beyond what its compact dimensions would suggest.
The system is suited to background music playback in applications ranging from clubs, bars and cafes, right through to theatres and AV presentations. The low-frequency transducer is an 8” woofer with a 1,5” voice coil. Woofer design is the result of the latest refinements in RCF experience in compact active and passive subwoofer design, resulting in a fast and controlled reproduction of the bass frequency range.
